Amazon Publication Options

Publication Option	Description	Extended Description
Order Import	Import orders into your online store	Selecting this option means that any orders made on this marketplace will be imported to your cart, and appear in your cart like any other order.
FBA Order Import	Import Orders Amazon have Fulfilled	Enabling this setting means we pull over any orders that have been generated through your Amazon FBA account. We will pull these order through as completed order to your cart. This setting is especially helpful for accounting purposes.
Order Status Updates	Send order shipments/cancellations to the channel	This setting allows us to update the marketplace with any order changes made in your cart to the marketplace. This setting will need to be enabled in order to ensure order status updates such as "Cancelled" or "Shipped" are published are updated on your market places. If you intend on updating your market place orders manually within the market place, you can leave this value unticked.

Shipment + Tracking	Confirm only shipments with tracking	Having this option ticked means we will only update Amazon with the order status of "Shipped" when a tracking number has been allocated to your orders in your cart.
Publish Products	Publish Products to the channel	This option will need be selected if you wish for ChannelUnity to create listings on Amazon.
Publish Images	Publish product image updates to the channel	You will need to select this option in order for us to take the images from your store and use them on your listings in Amazon.
Stock Sync	Publish stock level updates to the channel	This option ensures that all the stock levels will flow freely between your store and selected marketplace. For example, if your store stock levels are showing a value of 10, we will push this quantity into your connected marketplace. Similarly, if one of these items sells on the selected marketplace we will then update your store inventory with the value of 9.
Price Sync	Publish price updates to the channel	Selecting this option allows to to affect the price of you items on this marketplace. We will use the value in the field you have mapped against price, and will apply any pricing chances made if you have created these in your in a listing setting.
