

Listings

This article will take you through each of the listing statuses that are in ChannelUnity, and how your products move between these statuses; whether it's with an action from you, or an automatic update.

This article assumes you have gone through the initial set up processes and have at least connected your store, a valid marketplace, described your product fields and categories, and created listing settings (where applicable). If you have not done all parts of the initial setup process [please click here](#) to view all our related help and support articles.

Start in your ChannelUnity account, and click on: Listings. This should then bring you to a screen that looks like this:

Here you can see the main functions within this area of ChannelUnity: Main Settings, Publication Options, Download Existing eBay Listings, Default Listing Settings and Repeat Setup Wizard. Note that some of these functions are only available for specific marketplaces.

Main Settings

The Main Settings area is split into two sections. Firstly the Connect an account section, where you can change the marketplace account to a new account if you so wish. Simply click on the blue, "Connect to a Marketplace Account" and follow the instructions given there in order to change the marketplace account associated within ChannelUnity.

The second section is where you can specify which store front you would like to connect your chosen marketplace to. This feature is especially useful if you have various store fronts optimised for languages. Simply use the drop-down to select the store front you wish to connect to, and then select "Save".

Main Settings

Connect an account

If you need to change the marketplace account which this subscription is connected to, please click on the button below. You will be asked to sign into your Amazon account and will then be asked to grant permission for ChannelUnity to access your account. Once complete, you will be returned to this page.

Connect a store

ChannelUnity is designed to connect an online marketplace to your existing online store. However, with some modern shopping carts such as Magento it is possible to create stores within your online store. Therefore, which online store should we link to this channel?
